

Pollinator Habitat Outreach Program Sign Order Form

Pollinator Habitat Outreach Project

Native wildflowers and grasses provide valuable habitat for pollinating insects, grassland songbirds, pheasants, quail, and other wildlife.

Pollinators impact 75% of the global food supply, are keystone indicators of environmental health, and their populations are in decline.

To learn more about pollinators, contact Pheasants Forever or Quail Forever at:
www.pheasantsforever.org
www.quailforever.org

This sign order form is specific to **Pollinator Habitat Outreach Projects**. Your chapter can order a sign specific to your local project (example on the left). The signs are plastic and are 16" x 20" in size. They are designed to be screwed to a wooden post or bolted to a metal u-post. Signs should be ordered at *least 4 weeks prior* to your project date. The cost of your custom Pollinator Habitat Outreach Project sign will be \$25 plus shipping.

Number of signs needed:
